Northern Apex-RFID News

Introducing API Alliance, Inc.

Northern Apex Corporation is currently undergoing a transition. For years we have grouped our Electro Mechanical Contract Assembly Services Division with our RFID Integration Services Division. In order to allow more "internal" clarity to our separate operations, we have decided it is more efficient to split the divisions into 2 distinct Corporations.

Now the Electro-Mechanical Division will be identified as API Alliance Incorporated. However, the RFID Services will remain under the original name, Northern Apex Corporation. API Alliance will still continue to build RFID products for Northern Apex.

Where in the World is Apex Now?

RFID Journal Live

Washi Wrap, LLC

Northern Apex has partnered with Washi Wrap, LLC for our ARTiFACT TRAC™ solution. Washi Wrap provides RFID Tag Conversion by Museum Professionals for Museum Professionals, something that has been needed to remove the uncertainty in tagging priceless works of art. You can visit our ARTiFACT TRAC™ web-page at: www.NorthernApex-RFID.com/Artifacttrac.html or Washi Wrap's page: www.washiwrap.com.

A Cost Effective Solution to California's ePedigree Mandate

It is well known in the Pharmaceutical world that California has delayed the state's ePedigree Mandate until January 2011. This delay was somewhat expected due to the depth of California's requirements.

Even with the delay, Northern Apex is continuing to help forward thinking pharmaceutical manufacturers and re-packagers meet California's future requirements.

A cost effective part of Apex's mandate solution is the creation of a Mobile Serialization Unit. The Mobile Serialization Unit can be used to incorporate RFID or 2D data matrix based serialization into multiple products and production lines at a fraction of the time and cost of multiple line integrations.

Flexible and versatile, the mobile unit supports UHF or HF (or both) RFID frequencies, reads and writes to RFID tags, processes single units or multi-packs, and can be connected wired or wireless.

More benefits to the Mobile Serialization Unit -

- Rapid deployment time
- Eliminates disruption to the production line
- Minimizes down time
- Eliminates the need for FDA re-validation of the line

For more information about our Mobile Serialization Unit or the California Mandate/delay, please contact Sales at 260.637.2739 or Sales@Northernapex-rfid.com.
