Introducing our NEW 900MHz Near-Field Antenna Wand

Northern Apex has created a 900 MHz near-field handheld antenna wand (NA -NF-900). The NA -NF-900 is light weight, and with its small size and 10 foot cord length, you have the ability to move around objects to read difficult to reach tags where other RFID antennas will not reach. The NA -NF-900's 900 MHz frequency gives you a read distance* from 3" - 6" with a far better read capability than 13.65 MHz , especially around read interfering objects such as metal.

Riddle:

What has feet and legs,
and nothing else?

For the Answer: **Go to**

www.northernapex-rfid.com

NA900 Details:

Read Distance: 3 - 6 inches*

*Read distance with vary depending on materials in the field

Power: 1 Watt

Frequency: 900 MHz UHF

Wand Length: 13.25 inches

Cord length: 10 feet

Head width: 3.375 inches

Head thickness: 0.5 inches

Weight: 1.25 lbs

Northern Apex is now on facebook. Please feel free to visit our page and become a fan! You can find us here:
