

## **Northern Apex Creates an RFID Device to Add to the Functionality of Symbol/Motorola's MC9000 Handheld Computer and Barcode Reader**

Fort Wayne, Indiana – September 17, 2007 - Northern Apex Corporation has engineered a snap-on RFID read/write device for Symbol/Motorola's MC9000 handheld computer.

The MC9000 can be used as a barcode scanner, optional 900 MHz RFID reader and handheld computer – allowing you to quickly scan your inventory and place it into your inventory management software. This handy device is used in retail stores and wholesale warehouses throughout North America. Northern Apex has harnessed this technology and engineered a snap-on device that will allow the MC9000 to go beyond its standard functions and become a portable 13.56 MHz RFID reader/writer.

Michael Gigli – General Manager of Northern Apex Corporation stated, “The MC9000 Snap-On is a wonderful tool, it gives retailers and warehouses alike the ability to conduct an accurate RFID or barcode inventory and put the information directly into their inventory management software, all in one innovative device. As a Symbol/Motorola Channel Partner we were more than happy to engineer a solution that will add to the sales growth of Symbol's MC9000,” added Gigli.

“We have spent a significant amount of time researching and developing the MC9000 Snap-On,” said Rick Raber, CTO of Northern Apex Corporation. “This device was created to provide current or future users of the MC9000 the ability to also read and write HF RFID in a reasonably priced Snap-On module,” said Raber.

For more information on the MC9000 SnapOn or to purchase one, please contact Northern Apex Corporation for details: 260.637.2739, [www.NorthernApex-RFID.com](http://www.NorthernApex-RFID.com) or [sales@NorthernApex-RFID.com](mailto:sales@NorthernApex-RFID.com).

### **About Northern Apex:**

Northern Apex ([www.NorthernApex-RFID.com](http://www.NorthernApex-RFID.com)) is recognized and respected as a pioneer and a lead integrator in the world of RFID (*Radio Frequency Identification*) technology. Over the past ten years, Northern Apex has developed a reputation for innovation, customer focus and affordability providing RFID integrated components, engineered solutions and complete RFID turnkey systems. Northern Apex has fielded numerous custom RFID solutions by leveraging a keen understanding of the physics of RFID, a broad knowledge of the available technologies and a passion for customer service.
